

Seeking US and International sites to participate in iCOR2

International Collaborative Office Rounds 2 (iCOR2):
Inter-Professional Learning Around Psychosocial, Developmental and Behavioral Health

What is iCOR2?

iCOR2 is an interprofessional monthly meeting of US and possibly international clinicians that includes Primary Care Pediatricians, Developmental-Behavioral Pediatricians (DBP), Child and Adolescent Psychiatrists (CAP), and other MCH professionals, including psychologists, nurse practitioners and social workers and trainees, via video-conferencing. The purpose is to discuss real cases from the participants' practice using a reflective peer supervision model.

The goals of this program are to:

- Learn different approaches to developmental, behavioral and emotional problems
- Examine the effects of trauma and social, political and/or economic distress on children and families
- Improve pediatric primary care clinicians' capacity to recognize and manage psychosocial and developmental concerns within their practice
- Appreciate the role of cultural and national/legal differences, and practice variation in the care of children with developmental, behavioral and emotional problems

What is a Site?

- A broad interprofessional team of at least **5 individuals** that must include the participation of **general pediatrics, DBP and/or CAP**. Other MCH professionals and trainees *are* encouraged to participate!
- 3 sites will be strategically linked through videoconferencing, according to their goals, interests, location and populations served. The three sites form a "node" and will meet a minimum of 10 times per year via videoconference. At least one DBP and/or CAP from each site must be willing to serve as the moderator or alternative moderator for the "node."

What does a Site do?

- Meets monthly for 2 years during the academic year resulting in 10 sessions/year. Meetings will last 1½ hours. Attendance at each meeting should be $\geq 80\%$.
- Alternates presenting cases with the other sites in the node
- Completes (1) a baseline needs assessment and survey, (2) brief evaluations after every session, (3) a session summary when they are the presenting site, and (4) yearly evaluations
- Documents that iCOR2 members will have 2 hours/month to participate fully in the program (such as a letter from a chairman)

iCOR2 – Anticipated Benefits

- SDBP will provide the video infrastructure for groups to meet and a share point site to communicate in between teleconference sessions
- Participants will be trained and mentored around leading and participating in COR groups
- Participants will develop extensive interprofessional networks across the country and internationally
- Participants will have access to a broad interprofessional group of experts
- There is no charge for participation!

If you are interested in applying to be a site, go to www.SDBP.org to access the application. Applications will be accepted until **November 15**. Depending on the volume of applications received, not all site applications may be selected to participate on the first round.

iCOR2 is a collaboration of the iCOR2 Committee, the Society for Developmental Behavioral Pediatrics, and the International Developmental Pediatrics Association, and is funded by MCHB.
